

# Florida Fast Facts

## TRUCKING DRIVES THE ECONOMY

- **Employment:** In 2015, the trucking industry in Florida provided 312,020 jobs or 1 out of 22 in the state. Total trucking industry wages paid in Florida in 2015 exceeded \$14 billion, with an average annual trucking industry salary of \$44,778. The U.S. Bureau of Labor Statistics (BLS) reported in May 2015 that heavy and tractor-trailer truck drivers held 72,280 jobs with an average annual salary of \$37,830.
- **Small Business Emphasis:** As of April 2015, there were 27,960 trucking companies located in Florida, most of them small, locally owned businesses. These companies are served by a wide range of supporting businesses both large and small.
- **Transportation of Essential Products:** Trucks transported 79% of total manufactured tonnage in the state in 2012 or 345,664 tons per day. 84.9% of Florida communities depend exclusively on trucks to move their goods.

## TRUCKING PAYS THE FREIGHT

- **As an Industry:** In 2014, the trucking industry in Florida paid approximately \$1.3 billion in federal and state roadway taxes. The industry paid 32% of all taxes owed by Florida motorists, despite trucks representing only 7% of vehicle miles traveled in the state.
- **Individual Companies:** As of January 2016, a typical five-axle tractor-semitrailer combination paid \$6,739 in state highway user fees and taxes in addition to \$8,906 in federal user fees and taxes. These taxes were over and above the typical taxes paid by businesses in Florida.
- **Roadway Use:** In 2014, Florida had 122,391 miles of public roads over which all motorists traveled 201 billion miles. Trucking's use of the public roads was 13.7 billion miles.

## SAFETY MATTERS

- **Continually Improving:** In 2014 the large truck fatal crash rate was 1.23 fatal crashes per 100 million vehicle miles traveled (VMT). This rate has dropped by 73% since the U.S. Department of Transportation (DOT) began keeping these records in 1975. The 2014 fatal crash rate for the state of Florida was 1.23 per 100 million VMT.
- **Sharing the Road:** The trucking industry is committed to sharing the road safely with all vehicles. The Share the Road program sends a team of professional truck drivers to communities around the country to teach car drivers about truck blind spots, stopping distances and how to merge safely around large trucks, all designed to reduce the number of car-truck accidents.
- **Safety First:** Florida Trucking Association members put safety first through improved driver training, investment in advanced safety technologies and active participation in industry safety initiatives at the local, state and national levels.

## TRUCKS DELIVER A CLEANER TOMORROW

- **Fuel Consumption:** The trucking industry continues to improve energy and environmental efficiency even while increasing the number of miles driven. In 2014, trucks consumed 97 billion fewer gallons of fuel than passenger vehicles in the U.S. and accounted for just 17% of the total highway transportation fuel consumed.
- **Emissions:** Through advancements in engine technology and fuel refinements, new diesel truck engines produce 98% fewer particulate matter (PM) and nitrogen oxides (NOx) emissions than a similar engine manufactured prior to 1990. Sulfur emissions from diesel engines have also been reduced by 97% since 1999.
- **Partnerships:** Through the U.S. Environmental Protection Agency's (EPA) SmartWay Transport Partnership, the trucking industry is working with government and businesses to quantify greenhouse gas emissions and take steps to reduce them.
